

P3® Personalisation Preparation Process

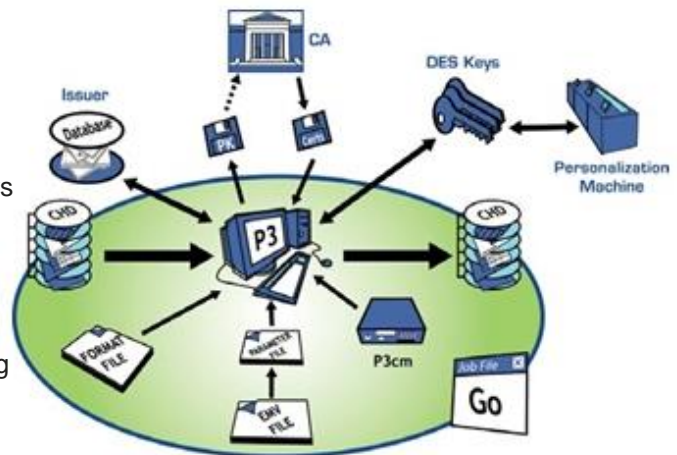

Contact/Contactless EMV® Data Preparation Solution

Keep control of your Master keys

P3 is a turnkey solution comprising of a Windows-based application and a FIPS 140-2 Level 3 approved hardware security module (HSM) It provides a simple low cost EMV data preparation solution for issuers to migrate from magnetic stripe cards to EMV smart cards. All the EMV card keys and data required for the various card association applications are created and managed in-house by the issuer in a range of output formats, delivering flexibility in choosing one or more bureaus for the card personalisation process

Key Benefits

- > Delivers 100% in-house control over cryptographic keys
- > Supports all major card association payment applications
- > Generates keys and EMV parameters from existing magnetic stripe files
- > Supports instant issuance and on-demand replacement of cards
- > RSA key generation with key caching
- > Flexible output format to support personalization of MULTOS, GlobalPlatform and proprietary single/multi-application cards

Business Impact

Maximise security by retaining control of Master keys

P3 links to a secure database of cryptographic keys, to an EMV certificate authority and to hardware security modules that ensure the highest levels of protection for card data and keys. - All cryptographic processing and keys are kept in-house

Freedom to choose the right card for the Job

Supports all major open standard and proprietary cards - Kept up to date with new versions of applications and cards

Easy integration

P3 preparation solution is front and back end agnostic – it works with all popular CMS and personalisation systems cards.

Cost effective

Users can do everything in-house or shop- around for the lowest cost production bureaus

PAYMENT SCHEME SUPPORT

P3® Technical specifications

Applications supported

P3 supports the following applications of the major card associations:

- American Express – AEIPS, ExpressPay, ExpressPay Mobile
- Discover – D-PAS, ZIP
- JCB – J/Smart, J/Speedy J/Speedy 2
- MasterCard – M/Chip Lite, M/Chip 2 Select, M/Chip 4, M/Chip Flex, M/Chip Advance, PayPass, PayPass Mobile
- Saudi Arabian Monetary Agency (SAMA) – SPAN2
- Union Pay – PBOC
- Visa – VSDC (SDA or DDA), qVSDC, MSD, VMPA, payWave

P3 supports the following EMV authentication applications:

- MasterCard – CAP (chip authentication program)
- Visa – DPA (dynamic passcode authentication)

P3 supports other applications through GlobalPlatform scripting language

- P3 uses an extended version of the GlobalPlatform scripting language to support data generation for MULTOS applications

Card Platforms supported

P3 is card platform independent and as such supports the following card platforms:

- GlobalPlatform
- MULTOS
- Proprietary single and multi-application cards

Operating systems supported

The latest version of P3 V1.9.1 has been tested on the following Windows operating systems:

- Windows 2012 Server R2- x64 Standard Edition
- Windows 2012 Server: x64 Standard Edition
- Windows 2008 Server R2: SP 1 x64 Standard Edition
- Windows 2008 Server: SP 2 x86 Standard Edition

Minimum hardware configuration

- Computer: Processor 2GHz, 4GB RAM, 256GB HD, 10/100/1000MB Ethernet NIC required
- Display: 1024 x 768 resolution

P3 Advance vs P3 Server

P3 Advance is a medium volume solution for Mid-sized centralised issuing banks and small volume bureaux P3 Server is a scalable volume solution for large scale Issuers and Bureaux that also offers the following functionality:

- Instant and Post Issuance support
- Caching of RSA keys (KeyCaching)
- Support multiple Hardware Security Modules (HSMs)
- Job submission via Multiple channels TCP/IP ,MSMQ

Thales HSM support

P3 V1.9.1 operates with the following crypto modules

- payShield 9000 with firmware version 1122:0909 or above
- P3CM-250 with firmware version 1122:P816 or above

Export restrictions

Both P3 Advance and P3 Server software are exempt from UK export restrictions (excluding known restricted countries) when sold to financial organisations for predominately financial application usage.

For a non-financial application, such as digital ID, it may be necessary to obtain a specific export license.

Please contact your local Barnes representative for details.
