

CAT 3000v3CL

EMV[®] Personalisation Validation Tool + Test Script Development Tool

A cost effective, flexible and powerful script driven test development environment for contact & contactless chip apps

The CAT 3000v3CL is ideal for chip card developers, manufacturers and issuers who are looking for a more sophisticated validation tool for proprietary payment and/ or multi-application tests. CAT 3000v3CL users can easily and rapidly develop test suites for a wide variety of chip card applications such as EMV,

GSM/3G/4G, Loyalty and E-security. In addition to the test script development capability, this tool is fully compatible with the Barnes EMV Personalisation Validation Test Tool (CPT 3000v3CL) providing a powerful Level 2 test platform whatever the payment application.

Solution Highlights

- ✓ Script-based test suites can be run in isolation, or be linked together to perform multi-application tests in a single card insertion; this includes checks to both chip and magnetic strip data.
- ✓ An EMV payment application test suite is provided. New test scripts are written in the industry standard TCL scripting language.
- ✓ Supports all payment devices: contact and contactless cards, mobile phones, and tokens.
- ✓ Developed in collaboration with Visa and Mastercard, and used by Visa, Mastercard, American Express, Discover, JCB, major banks and card bureaus globally.

SUPPORTED SPECIFICATIONS

- American Express
- ATH
- Afrigo
- BancNet
- BKM Troy
- Credibanco
- China UnionPay & F-CUP
- Discover D-PAS 1.1 CPV
- Discover D-PAS Connect 2.1 CPV
- Discover D-PAS Mobile
- EBC
- Eltpos (CPC)
- Eltpos (Mobile)
- GIE CB & CPACE
- GIMAC
- Interc
- Jaywan
- /Smart 2 & F-JCB -2
- /Smart 3 & F-JCB 3
- JCB HPA
- Mada-legacy / Pure
- Mastercard CPV
- Mastercard NCMC Certification
- MCCS
- NETS PVT
- NETS Wise RSA
- NSICCS
- PayPak
- PBOC
- PURE QC
- RuPay PVT / qSparc
- RuPay DFS DI / D-PAS Connect
- SERMEPA Advantis
- TakaPay
- Troy BKM
- TWIN
- Verve WLA / Pure
- Visa GPR PVT, Visa Global & Europe
- PVT (Self-Service)

THE BARNES ADVANTAGE

Barnes is the chosen test tool of Banks & Issuers, Card Manufacturers, Personalisation Bureaus and Test Laboratories worldwide.

BUSINESS AGILITY

Barnes test tools are easy to use by both technical and non-technical users, and speed up card development and payment scheme certification.

COST ELIMINATION

The high business costs and wasted resources of producing and issuing invalid cards are eliminated.

RISK REDUCTION

The reputational risk of issuing invalid EMV cards to end customers is reduced.

FUTURE PROOFED

Barnes works in partnership with all major payment schemes. As scheme rules evolve, Barnes rapidly makes updated test script packs available to customers via the Barnes website.

SERVICE EXCELLENCE

Our clients have every confidence that, whatever their test requirement, the Barnes team is always on-hand to deliver expert advice and fast support.

FEATURES AND BENEFITS

Multiple Application Tests

In a single card insertion, the tool confirms the data on the chip and magnetic stripe is correct and valid according to the issuer profile. The card account number and issue / expiry dates are displayed for visual verification of the card embossing indent print. Optionally, the card livery can be displayed to verify the correct card stock has been used.

Multi-level User Interface

The tool is designed to be easy to use for both the non-technical operator and at the same time provides detailed technical information for IT and engineering staff. Production control features include User Access Control, Batch Test and Event Logging, which are supplemented with intuitive data element displays for problem solving and data analysis.

Powerful Diagnostic Tools

Data displays include Card Test Result Summary; Detailed Test Result Tree and Full Engineering Log. Hyperlinks between the various levels of displays and directly to the EMV and payment scheme specification references allow the user to quickly identify and diagnose problems.

Industry Standard TCL Scripting Language

The TCL API gives the script programmer full control over the tools extensive facilities, including card operations, user interaction, results displays and log file generation. Example scripts and an extensive library of TCL procedures to perform commonly required chip card testing operations are included. Both the API and the library set are fully documented so that script developers can hit the ground running.

PCI Security

PCI compliant masking, log-out and user controls enable full control of personal cardholder data on screen and in reports.

Adaptable Test Scenarios and Scripts

Users can easily define "QuickTest" profiles to test their own chip data requirements, in line with, or in place of, payment scheme requirements. Test scripts are not restricted to EMV; other types of smart card application can also be tested, for example payment, security and loyalty applications.

Cryptographic Authentication

Static (SDA), Dynamic (DDA) and Combined (CDA) data authentication is fully supported by the tool. RSA algorithms are also supported.

Key Management

Complete with a comprehensive set of Visa, Mastercard, JCB and Discover public keys. Additional keys can be imported through a key management system.

Network Capability

The tool can be used in a networked environment with individualised user access levels and settings. All test scripts, scenarios, standard profiles, public keys and reporting for multiple tools can be managed centrally, ensuring consistency across all units.

Remote Testing

Issuers and scheme authorities can securely evaluate and approve cards remotely, eliminating the costs and delays of sending sample cards around the world.

OPTIONAL SOLUTIONS

Host Simulation Module

Adds the ability to verify secret keys either in software or with the optional Hardware Security Module connectivity.

Payment Scheme Certification Test Modules

Allow certification tests to be performed to accelerate payment scheme approval.

TECHNICAL SPECIFICATIONS

Softwares

- OS: Windows 10 & 11 (32-bit & 64-bit)

Card Readers

- Barnes 3K7 Triple Interface reader (Mag Stripe, Contact and Contactless chip)
- Barnes 3R1 reader is available for reading metal / titanium cards
- Barnes 60H Batch reader
- Barnes 3K3 Card reader (Magnetic Stripe/ JIS Stripe/ Contact Chip)
- PC/SC reader
